Multiply Decimals by Whole Numbers

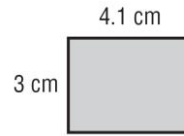

The area of a rectangle can be found by multiplying its length by its width.

$$\text{Area} = \text{length} \times \text{width}$$

$$\text{Area} = 3 \text{ cm} \times 4.1 \text{ cm}$$

$$\text{Area} = 12.3 \text{ cm}^2$$

The area of the rectangle is 12.3 square centimeters.

Find the area of each rectangle. Write the area inside the rectangle it measures.
