

RETAKE APPLICATION

Name:

Retake date: 4/29/15 (6th period)

Math Period:

Chapter Test #8

In order to be offered the opportunity to retake an assessment, you must complete this application and turn it in with signatures by you and a parent/guardian. A retake assessment is a privilege and should be treated as such. You may retake any chapter test on the assigned day. However, you may NOT retake Benchmark (End of Quarter Tests). You do not have to have received a low grade in order to participate in the retake process. Anyone can retake any chapter test on the retake date. The retake grade will replace the original grade even if it is lower.

The following criteria will be considered before granting a retake:

- Retake application completed and signed by student and parent
- Student initiative toward the retake process
- Responses to retake questions – answer all questions seriously and sufficiently.

All retakes must be completed on the *assigned* retake date.

1. What question topics did you answer incorrectly? (this part will be filled in during class)

2. What could you have done differently to prepare for the test?

3. What have you done since the test to ensure that you know have a better understanding of the concepts in this unit? Attach evidence (examples include “Extra Practice” sections at the end of every lesson or resources obtained from McGraw Hill website that were not assigned in class).

4. How have you been managing your time inside and outside of class? How would you honestly describe your work ethic?
